TECHNICAL DATA

❶ Crusher

Capacity:25-30m³/h

Dimension: 1750x780x2012mm

Hopper Dimension: 1320x325mm

Weight: 850kg

Screen Mesh Size : 8mm

Power: 15kw

❷ De-duster

Capacity: 25-30m³/h

Dimension: 3498x703x1955mm

Weight: 600kg

Screen Mesh Size: 2mm

Power: 4.87kw

❸ Dust-collector

Dimension: 2310x950x3390

Power: 7.5kw

❹ Mixer

Capacity: 55-100m³/h

Dimension: 1598x990x1724mm

Recommended mixing ratio: 6-20%

Power: 3.92kw

ADVANTAGES OF EPS RECYCLING SYSTEM

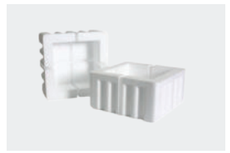

Waste EPS is recycled, greatly saving production costs.

Simple structure and flexible operation. The feeding speed can be controlled and the mixing ratio of the new material and the waste material can be controlled.

It combines crusher, de-dust, collection, and mixer to form integrated equipment with high recovery efficiency.

Each component is independent and easy to maintain. Provide online after-sale service.
